

SERVICES

I design and develop websites that effectively showcase products or services, building trust, generating leads, and driving higher conversion rates.

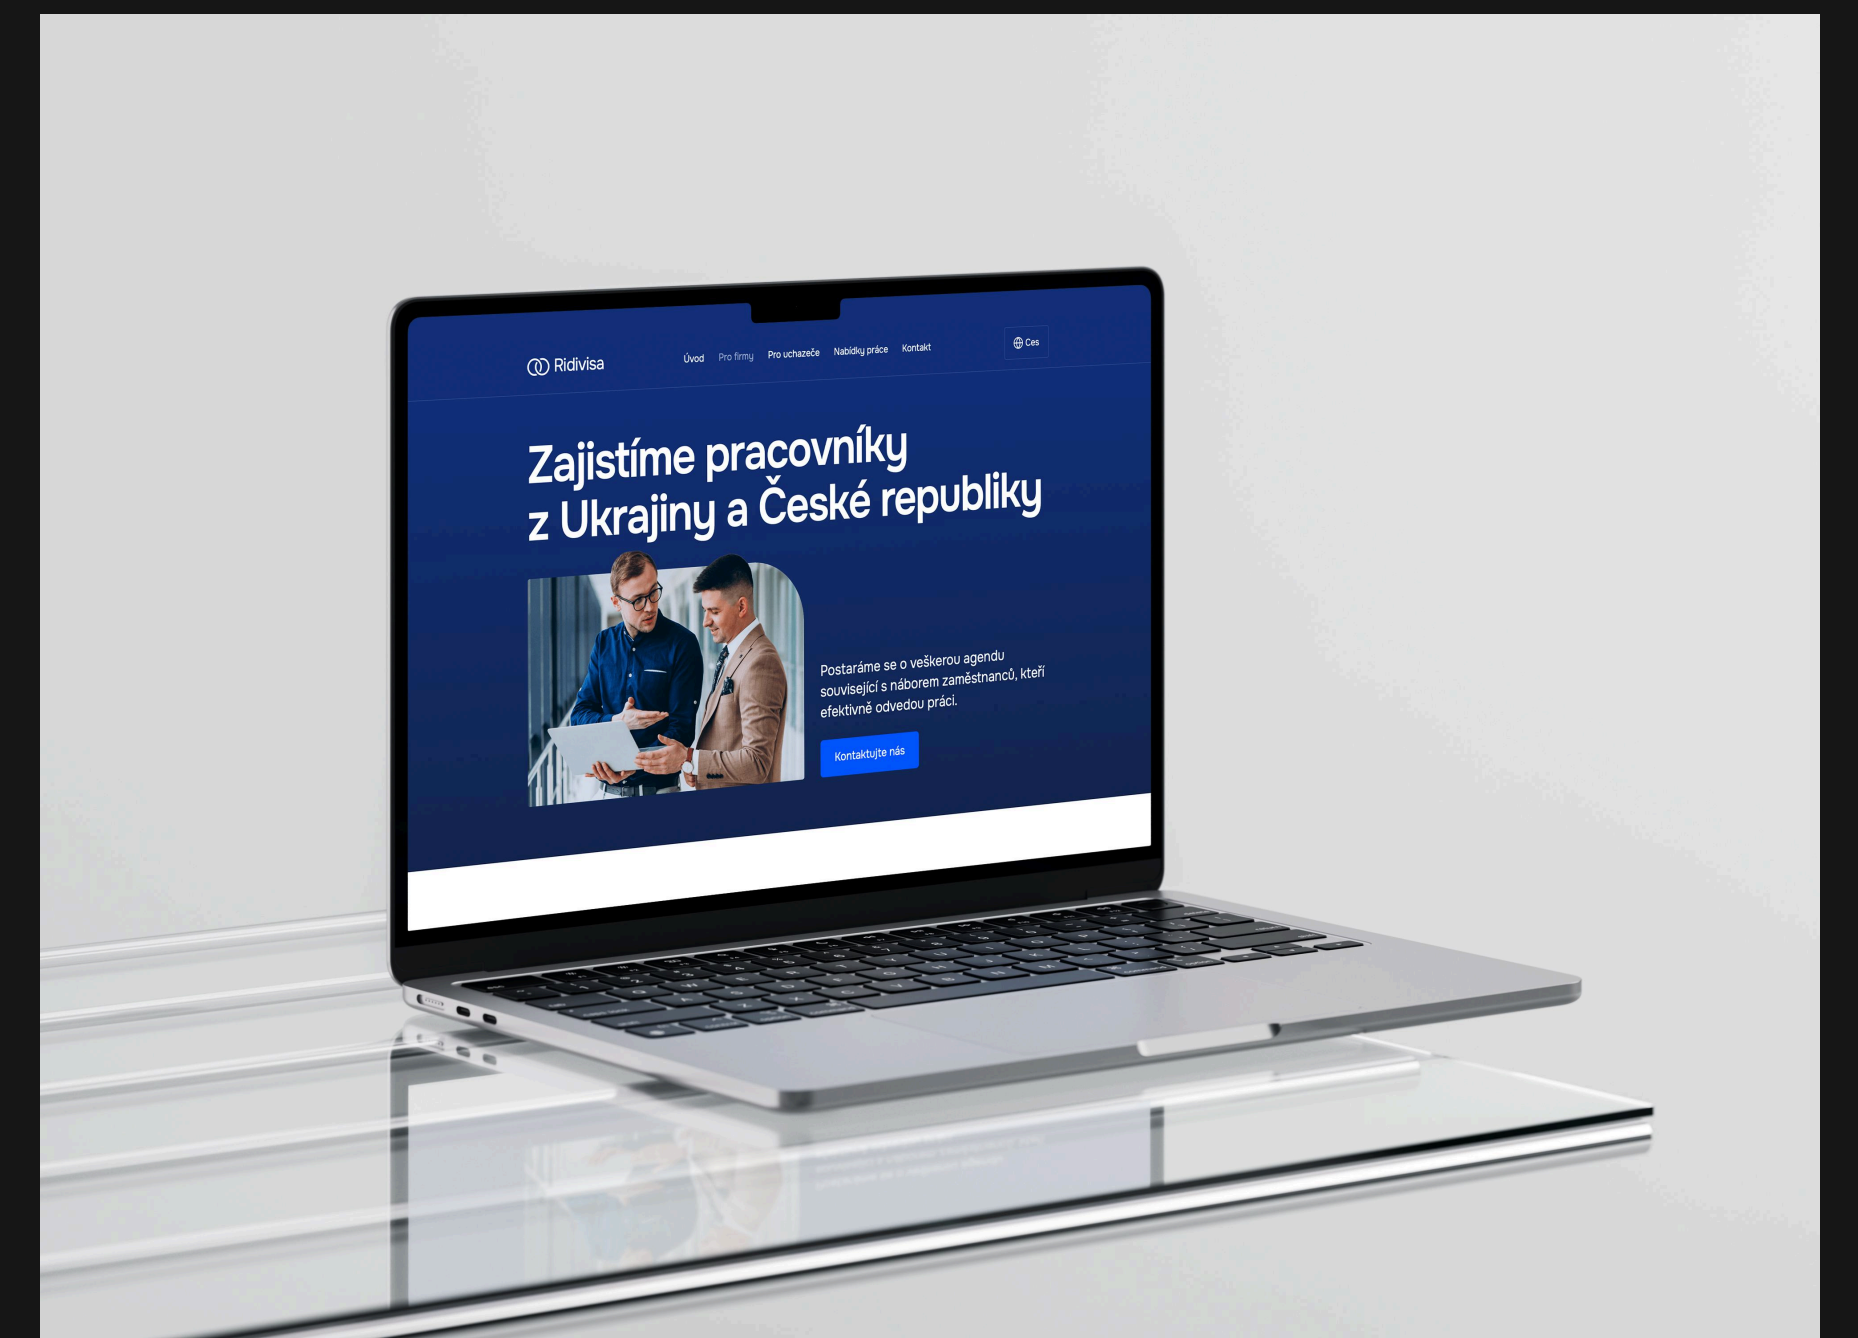

Single-page landing pages

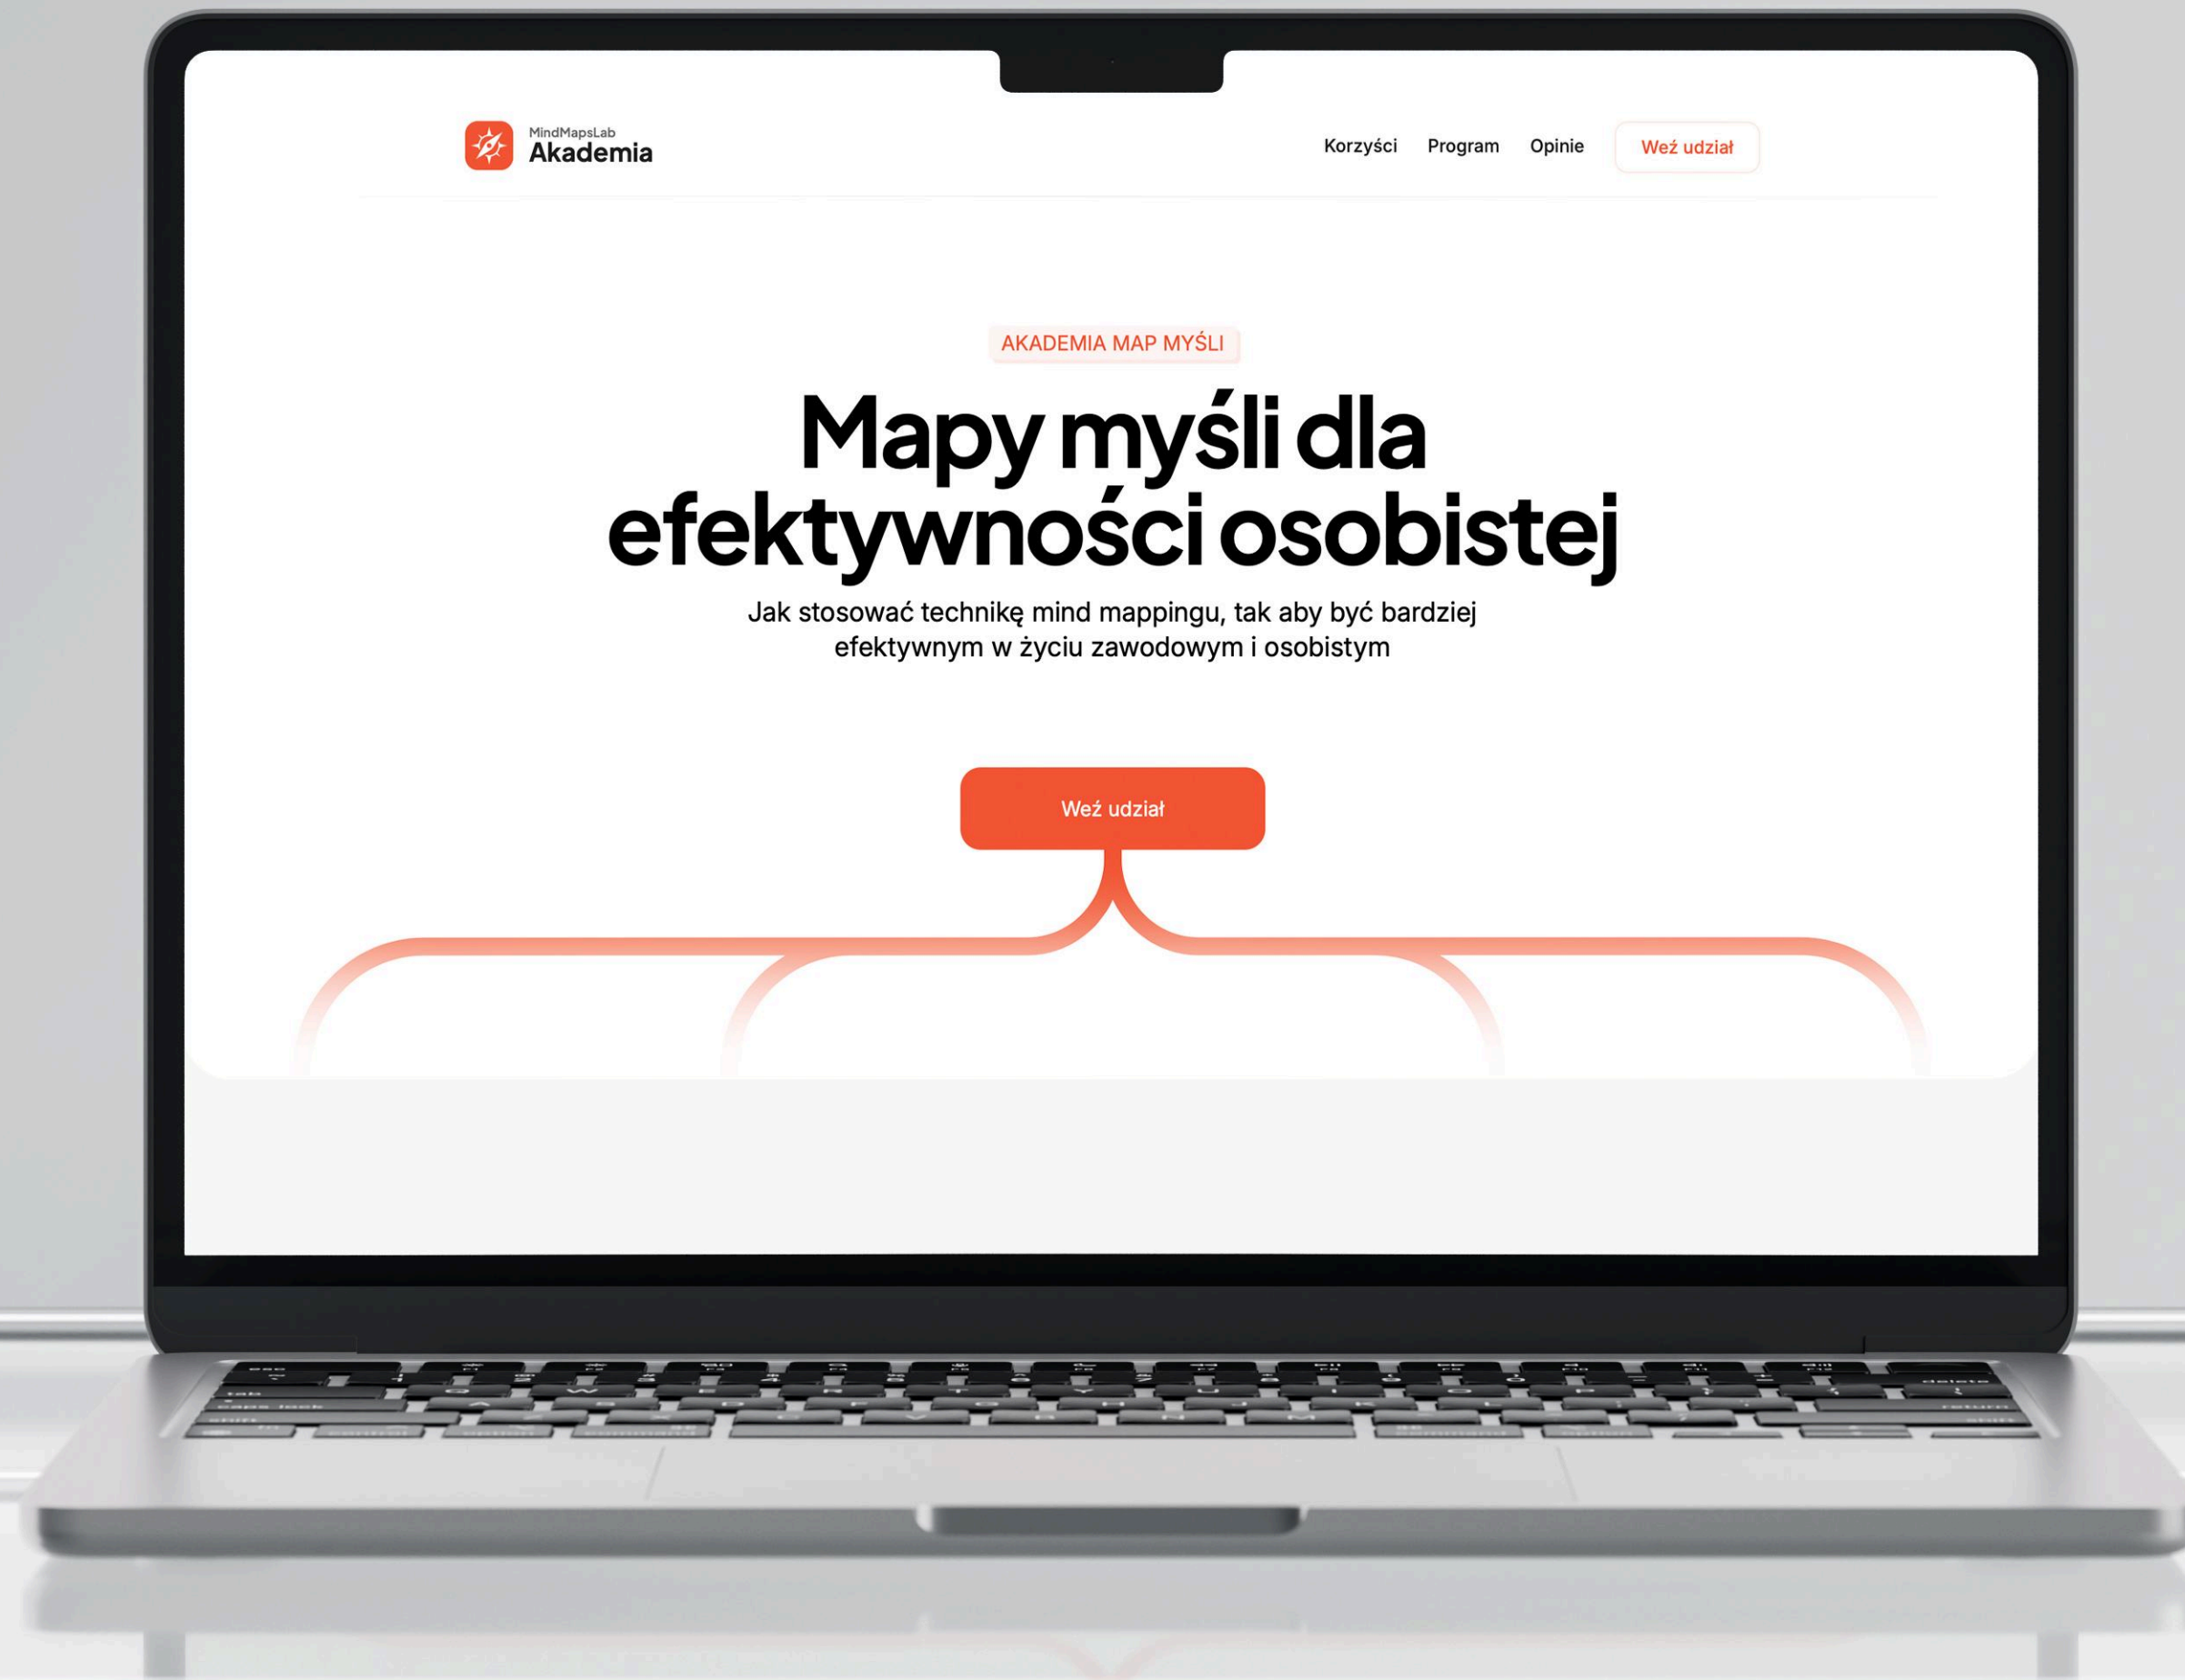

Product landing pages

Test landing pages

Multi-page websites

Corporate websites

EXPERIENCE

I have created websites for various sectors: education, information and knowledge management, technology, human resources, cleaning services. I'm open to working with new industries.

10+
websites designed

6+
websites implemented

PROCESS

You can hire me for specific steps or the entire workflow

01 Web Strategy

Collect and document all the key information needed to understand the website's business goals and the client's expectations. Based on this, I'll propose solutions with clear pricing and timelines.

02 Research & Analysis

Gather all the information required to create a website. Analyze how the product or service works, understand customer needs, and evaluate past user experiences. Conduct interviews with customers if necessary.

03 Prototype

Develop user scenarios and create a logical structure for the website. Write clear and engaging copy.

04 Visual and Interaction design

Choose an appropriate style and design the desktop version of the website. Organize the information to make it visually appealing and easy to understand. Plan and design animations and interactive elements.

05 Responsive design and Systematization

Adapt the design for tablet and mobile devices. Create a systematic design framework. Develop reusable components, if required.

06 Front-End Development and Testing

Build the website using Webflow or HTML/CSS. Test all functionalities to ensure everything works seamlessly and fix any issues.

PRINCIPLES

It's important for me to ensure every project is delivered on time, within budget, exceeds expectations, and provides real value to your business

Transparency

Everything I do is accessible to you at any time. I work in Figma and Notion, which I share with clients.

Balanced solutions

I focus on creating well-rounded solutions that meet business goals, provide an intuitive user experience, and are visually appealing.

Good communication

I stay in touch, keep you updated on my progress, and make an effort to clarify anything that's unclear.

COST

I work at a rate of **510\$ per week** on a B2B contract.

At the start of the project, I'll plan the timeline and calculate the total cost based on the estimated workload.

I'm open to working under different terms. Feel free to reach out, and we can discuss it!

Landing page

~ 3 – 6 weeks

1530 – 3060 \$

+ expenses

Multi-Page website

~ 5 – 9 weeks

2550 – 4590 \$

+ expenses
